

December 2024

WINTER PARKING RULES

- * In order to allow for proper snow removal from parking lots, **all vehicles must be cleared of snow and removed from their original parking spaces as soon as possible after a snowstorm. It is imperative that all vehicles be moved no later than 6 hours following a storm.** Failure to comply will result in the towing of the vehicle.
- * Temporarily parking around the perimeter until the plow comes through your area is permitted; once your area is plowed move your car back as quickly as possible.
- * Any vehicle parked in areas designated and marked as “Snow Emergency Areas” will be **towed**.
- * **If you plan to be away** during the winter season and are not taking your car, **arrangements must be made to have your car completely cleaned off and moved in the event of a snow storm.**
- * **Violators are subject to being towed with no additional warning, as this serves as an official notice. Not complying with winter parking rules creates a hazardous condition.**
